"We feel blessed to have our partnership with Grace Community Church and to have played a small part in their story of growth and impact over the last 30 years. It's relationships like this that bring the most gratification to what we do. God uses us to help provide the ministry tool, and then we get out of the way and watch Him use the Church to change lives."

--Bob Schrock, CEO
DJ Construction

History:

- In 1985, DJ Construction built a 2,160 sq. ft. addition on to the Goshen Grace Brethren Church on West Clinton Street.
- In the early 2000's, the name was changed and DJ remodeled the platform in the sanctuary prior to Grace Community Church outgrowing their building and relocating its Sunday services to the Goshen Middle School.
- The growth continued and in 2004, Grace turned to DJ to lead a DesignBuild process for their new 27,000 sq. ft. facility at their current location on CR 36. Before completion, it became apparent that the multi-purpose worship space should be even larger and DJ was able to increase it from 7,800 sq. ft. to nearly 10,000 sq. ft. with minimal financial impact. The space includes a walking track as part of the church's outreach to the Goshen community.
- In 2008, Grace again turned to DJ to essentially double the building and add parking. The addition included an alternative worship venue, a teen gathering space, ten classrooms and a theatre for the children's ministry, a large foyer, bookstore, café, and covered drop-off canopy.
