"The relationship that Pete Garber had developed previously with Facilities Manager, Fred Schrock, allowed the 2006 project for Carriage to go very smoothly. It's unfortunate that production at this facility wasn't able to continue past the recession, but we still value our friendship with Fred and appreciate the good working relationship we had through the years, culminating with the largest building we built during our first 60 years."

--Bob Schrock, CEO  
DJ Construction

### History:

- In the mid-2000s, Carriage, Inc. in Millersburg was getting more requests for their high-end RVs than they could produce. In 2006, the company chose DJ to build a new 136,542 sq. ft. manufacturing facility that would accommodate its fast growth. The steel building was completed using VP Building's wide bay trusses, which allowed bay spacing to be set at 54 feet.
- This new steel building was DJ'S largest to date, and increased Carriage's production capacity by an additional 50%.
- DJ also completed five other service projects for Carriage in addition to putting this 3.13 acres under roof.
