"The work we did for Laidig in 2007 and 2008 continued to establish us as a major contractor in the St. Joseph County market. The projects were large and challenging, but also rewarding. Our project manager left midway through, but Mike Yoder was our on-site representative and helped build relationships of trust in our team. We appreciate the references that Wyn Laidig and Tom Lindenman continue to give us."

--Bob Schrock, CEO
DJ Construction

History:

- DJ completed two major projects in back-to-back years for Laidig Systems. The first occurred in 2007 and consisted of adding a second story onto the already-existing office building. The addition was approximately the same size (9,000 sq. ft.) as the first floor, and the addition was completed without major interruptions to the company's day-to-day operations. The front of the building now features a barrel roof and clerestory windows at the main entrance lobby, effectively blending the two floors into one unified building.
- Starting before completion of the office addition, DJ also partnered with Laidig in 2008 to complete a 39,125 sq. ft. addition for the company's powder coat line. The addition increased the manufacturing space by more than 75% and allowed for their new powder coat equipment.
