### History:

- The South Bend Clinic and DJ have partnered on three major projects plus several others completed by DJ's service group.
- The first project occurred in 2008 when DJ provided 13,000 sq. ft. of additional space at the Granger campus. Without disrupting everyday office activities, DJ expanded the clinic's services by creating a new reception lobby, conference room, staff lounge, labs, and other rooms. The project also involved extensive site work.
- In 2009, DJ returned to the same facility and remodeled the break room, providing more natural light and updating décor, seating, and appliances.
- South Bend Clinic's cardiology and allergy departments at the main campus on Eddy Street were renovated in 2011 in three different phases, all to improve functionality and flow to the space.
- The South Bend Clinic also operates the Cancer Care Partners location on Day Road in Mishawaka. DJ did a major renovation and addition in preparation for Cancer Care Partners to occupy that facility in 2010.

"We have thoroughly enjoyed our seven-year relationship with the South Bend Clinic. Matt Romanin and Dave DuBois have been great to work with on the projects we have done for them at both the Granger and main campuses. We appreciate those projects, as well as the one for Cancer Care Partners, which were significant to our growth in St. Joseph County."
