“Our relationship with Triangle Rubber is one of loyalty, commitment and trust. We appreciate the work they have entrusted us with and we continue to do everything we can to deliver quality work at competitive pricing on a timely basis. Being able to also provide a shovel-ready site for their latest expansion on Elkhart’s east side and then seeing it come to fruition in time to meet their business needs was very rewarding for me.

--Bob Schrock, CEO

## History:

- Our partnership with Triangle Rubber and the Gerwels family covers the last 25 years, including dozens of projects by the DJ Service Group and the major projects listed below:
- In 1990 DJ designed & built a 20,000 sq. ft. addition to the Triangle Rubber plant on Elkhart Road in Goshen.
- Triangle selected DJ to begin their Thermo Plastic Division in the Goshen Industrial Park with a 15,000 sq. ft. building in 1997. Four (4) additions later, that facility grew to more than 80,000 sq. ft. (all by DJ) and completely built out the land available.
- In 2013, the Gerwels again turned to DJ Construction to design & build a similar 34,000 sq. ft. facility in Elkhart’s Beck Industrial Park. The new building is designed and positioned for expansion.
